JOY PUMPS – School/Anganwadi Water Supply Project....

System Description

See-Saw Pumps use the force lift technology to draw water from a well to an overhead tank above the ground level for storage and distribution.

It does not require electric power. See-Saw pumps work on the same technology and use the reciprocating motion to move the valves of a water cylinder.

The technology below the ground is same as the hand pump technology, hence making it very easy to maintain at village level.

Merry-Go-Round Pumps use force lift technology to draw water from a water source to an overhead tank above the ground level for storage and distribution.

It does not require electric power. The technology below the ground is same as the hand pump technology, hence making it very easy to maintain at village level and use the reciprocating motion to move the valves of a water cylinder.

These pumps use a specially designed mechanism to convert the revolving motion to a reciprocating one.

SEE SAW PUMP

Joy Pumps are an innovative concept of Span Pumps which pumps water from a bore well, a sump or a rain water harvesting tank. It uses playful energy of the children or the operators collectively to pump water. See-Saw pumps use the force lift technology to draw water from a well to an overhead tank above the ground level for storage and distribution.

MERRY GO ROUND PUMPS

Merry-Go-Round Pumps use force lift technology to draw water from a water source to an overhead tank above the ground level for storage and distribution

Project Details

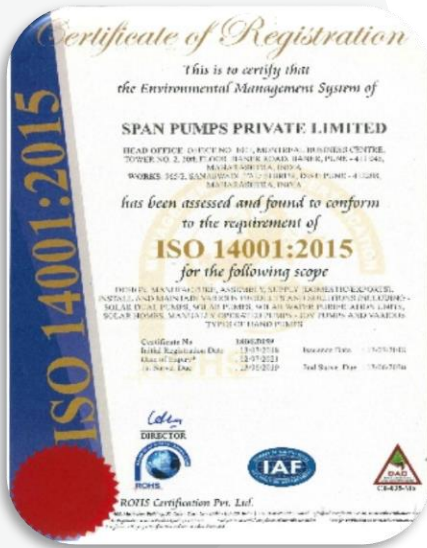

- ✓ Estimated Project Budget - **Below 0.02 Cr.**
- ✓ Cost Per Beneficiary
 - A) See Saw Pumping System - **INR 270/-**
 - B) Merry Go Round Pump - **INR 350/-**
- ✓ Cost Per Unit
 - A) See Saw - **1,35,000/- Approximately**
 - B) Merry Go Round Pump - **INR 1,75,000/- Approximately**
- ✓ Timeline for installation- **Up to 1 month**
- ✓ Estimated no. of beneficiaries- **100 – 500**

About Us..

- ✓ **Span Pumps Private Limited** is India's leading manufacturer & sustainable water solutions provider. **Established in 1987**, working extensively with domestic and international stakeholders for drinking, irrigation, sanitation, health & personal hygiene water requirements.
- ✓ The company has supplied water solutions across **Asia & Africa**.
- ✓ Our mission is to facilitate rural development and to satisfy the fundamental human need of drinking water and sanitation by offering innovative, affordable, high quality and easily manageable solutions.
- ✓ After satisfying all pre requisites to manufacture quality pumps as per specifications of Bureau of Indian standards we have received the **BIS and UN** certifications.

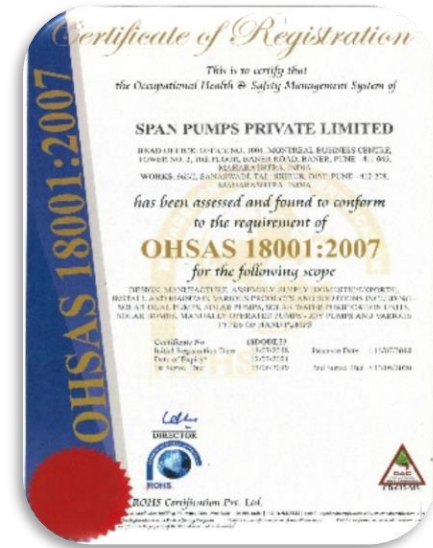

ACCREDITATION

ISO 14001:2015

ISO 9001:2015

OHSAS 18001:2007

Save Water, Save life

Thank you
&

Assure you our best attention and services at all times
