Case Studies

ONergising Education

Education is one aspect where small lights have impacted largely. A group of girls who use beacon and encourage their friends to use the same. "I tried out the light first and the remote controlled light, I now advise to all my friends and friends of friends to use it", said Shampa from from a High School in West Bengal.

ONergising Savings

Solar-powered Beacon lights has a huge impact in off-grid homes, replacing costly, kerosene lamps and candles with **20 times brighter**, cleaner light and providing **phone-charging** too. A remote controlled, **water and shock resistant** light is a multipurpose light through household and at work. It provides a **100 hours light back up** for any household work or shop work can be easily conducted in the **3 mode light display**.

ONergising Income Generation

Ajay from Balangir, Odisha, is a tailor who juggles between his tailoring shop and zari work as job-work. Few years ago he faced a major set back because his work place caught fire. Since then he has been looking for safer and longer means of lighting. He has started using Pilot which gives him **2 years of warranty** and **portability of using it** as standing lamp or dismantling and using it as a small light to do the detailing in his work.

ONergising Health

Tumpa is from a village in Deoghar, her village has dearth of electricity. "The kerosene lamp that I was using was affecting my health because there was a lot of soot, that's why my parents got me this solar lamp." Like her a lot many students/kids have switched to Solar lamp for better, steadier and cost effective source of electricity.
