

*Sonic Labeler is a pen-like labeling device which is commonly used for the purpose of identifying objects. The device comes with a booklet of reusable labels of different sizes which can be tagged with the required information in the audio format. Once a message is recorded and tagged to a label, the pen plays the corresponding audio file every time it is brought closer to that label. It is commonly used for labeling different containers in the kitchen, drawers, books, medicines, clothes etc. It has internal memory of 4GB which can store up to 20 hours of recording.*

## **Sonic Labeler**

**Memory is extendable to 8 GB with external memory card. It comes with a booklet of 228 reusable / re-recordable labels to store information. For tagging and identification of clothes, pack of 50 washable labels can be purchased separately.**
