

About E3 Waste Solutions

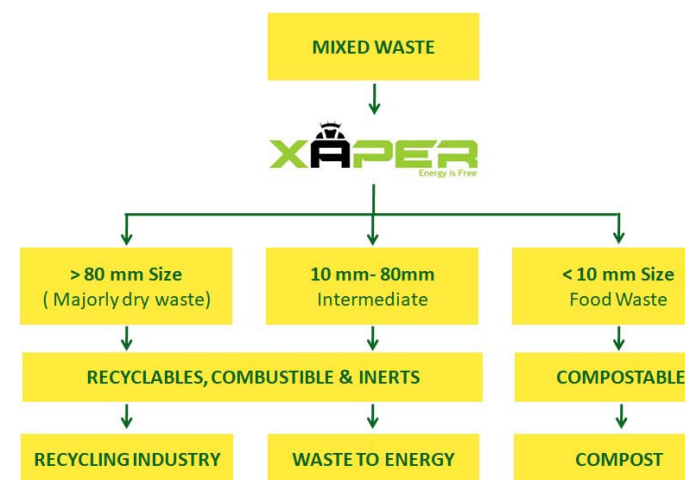

We are a technology-driven startup building machines and solutions for managing the menace of solid waste and generate energy from it. Our green technology helps to reduce carbon footprints thereby adding value to the environment.

Technology - XAPER

- One of its kind patented composter that segregates.
- Capable of composting wet waste & segregating dry waste simultaneously.
- Designed for decentralized composting and segregation at waste collection points, transfer points / dhallaos or in gated societies

XAPER : Process Flow

Suitable for

Municipality

Gated Community

Hotels & Restaurant

Institutional Establishment

ONLY YOU
CAN CHANGE
YOUR
WASTE TO
WEALTH

E3 WASTE SOLUTIONS

In-sync with Nature

What XAPER Offers ?

- Decentralized processing system
- Compact & easy to operate
- Accelerated decomposition of Food / Organic waste
- 70 -75% of substantial reduction in waste near the source of generation
- Better quality compost
- No Methane & H₂S generation
- No Leachate generation
- 70% savings in the waste transportation cost

Processing Capacity

- 1000Kg to 20000 kg /day Un-Segregated waste
- 25Kg to 500 kg / day Segregated wet waste
