HomeBiogas LTD produces small-scale, off-grid biogas systems that offer a comprehensive solution for waste management, renewable energy creation, clean-cooking, natural fertilizer production and sanitation for households and farms in peri-urban and rural areas.

HomeBiogas is the most efficient, affordable and user-friendly small-medium scale biodigester available. The HomeBiogas system converts organic food, animal and human waste into a clean cooking gas and natural, liquid fertilizer. HomeBiogas systems are in use in over 107 countries worldwide.

## UNIQUE FEATURES OF HOMEBIOGAS

- **Daily cooking gas:** 2 hours to 6 hours vary by system size.
- **User friendly:** Low maintenance.
- **Easy to transport:** Small box (23 kg to 32 KG).
- **Simple assembly:** in less than 2 hours.
- **Safety features:** Include filters, sealed tanks and automatic gas release valve.
- **Durable, high quality material:** With lifespan of 15+ years.

## HOMEBIOGAS BIO-TOILET

**THE MOST AFFORDABLE OFF-GRID SANITATION SOLUTION FOR HUMAN WASTE IN THE WORLD**

Treats toilet waste in addition to food waste and animal manure! The Bio-Toilet connects directly to all size of HomeBiogas biodigester and turns human waste into clean energy.

## PROVIDING RENEWABLE ENERGY AROUND THE WORLD, CHANGING PEOPLE’S LIVES AND SAVING THE ENVIRONMENT

Over 9,000 systems installed!
